

How to update your Warrior Forum Signature

This is a small guide to show you how to update your WF signature. It is in response to a number of emails asking me how to do this after reading the FREE report I gave you last week - [Wicked Simple Warriors Report](#)

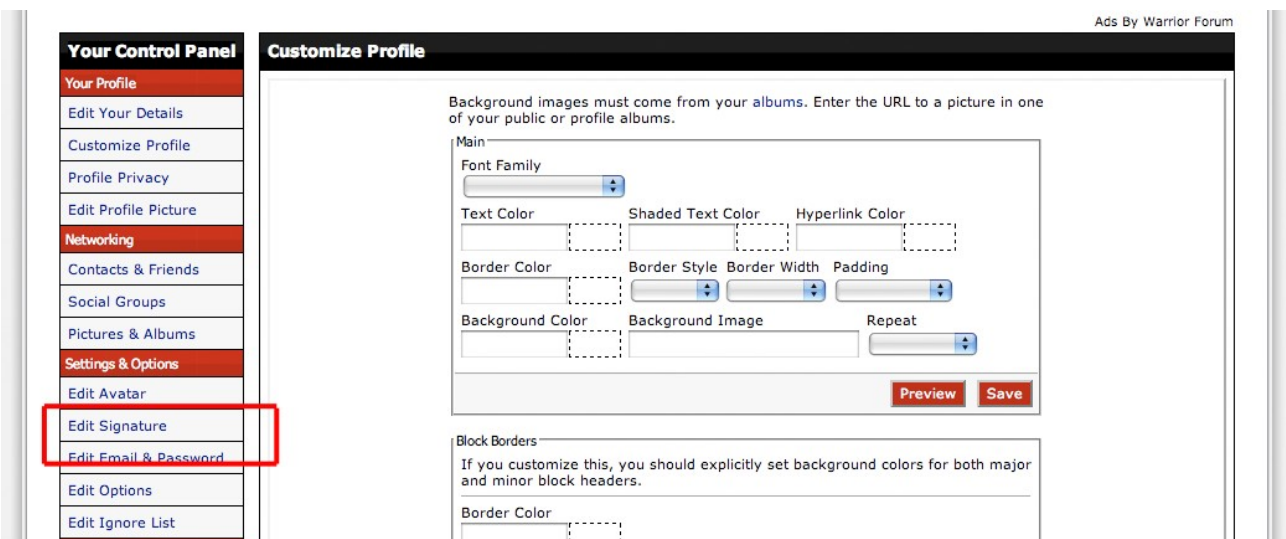

Firstly you will need to be logged into your WF account, and then you need to click on your Username:

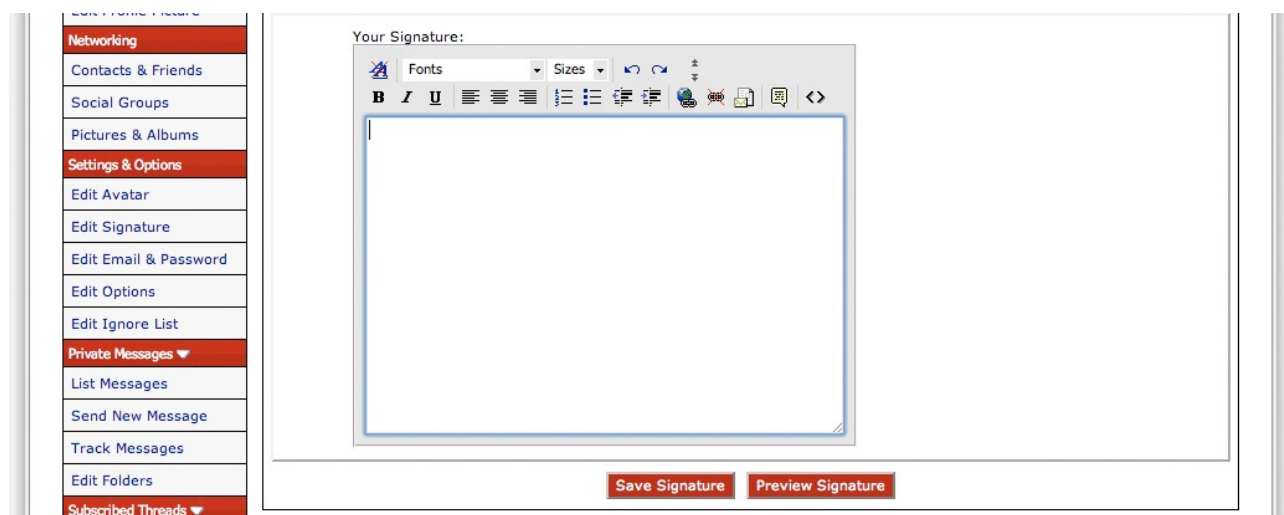

Once you have clicked your Username you need to click “Customize Profile”:

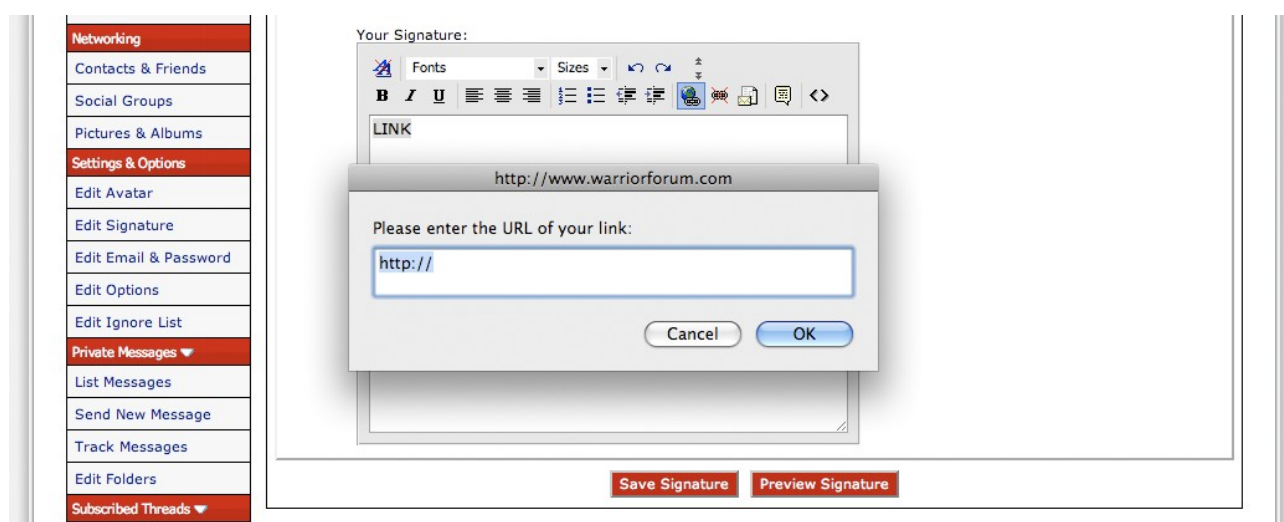

You now need to find the “Edit Signature” link down the left hand side of the screen:

Now you can update your signature in the blank box provided:

If you would like to add a link then you need to type your link in the box – Something like “Click here for your free report”. Highlight it, and then click on the hyperlink icon – the little world with a link chain in front of it. This will open a small box allowing you to enter your link address:

Once you have finished click “Save Signature” and you now have a shiny new sig.

Don't forget you can make even more money using this method if you laser target the threads you comment on.

E.G If you have decided to promote an AdSense Guide - then if you concentrate all your posts which revolve around Warriors having problem with AdSense then your Click Through Rate will increase massively.

To your success, Adam Smith
